

# About new solar container subsidy policy documents

What is the subsidy on solar?

Subsidy on solar is an initiative by the Government of India to promote clean and green energy. It aims to make solar power accessible to both corporate and private sectors, helping you save money and reduce dependence on the government grid.

How to apply solar subsidy?

To apply solar subsidy, you should follow the following steps: Step 1: Site Survey. Book Engineer Visit from here. Step 2: System Capacity, Costing & Performance Analysis Step 3: Buy Solar System & Installation Step 4: Apply for Net Metering Step 5: Get Solar Subsidy after 30 days of rooftop solar panel installation Source: PSPCL

Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.

What is Sde++ subsidy?

The scheme reimburses the difference between the cost price of renewable energy and the market value of the electricity supplied. For many business solar projects, SDE++ is an important financial support. It lowers the payback period and makes larger installations feasible. What is the SDE++ subsidy? The SDE++ is an operating subsidy.

Do I receive a subsidy if I feed back to the grid?

You only receive a subsidy for the electricity you feed back to the grid. For own consumption, a higher correction amount applies, reducing the subsidy amount. The correction amount is the amount the government expects you to receive per kWh on the market. The higher this amount, the lower the subsidy you will receive per kWh.

Why do we need a Bess subsidy?

The subsidy is needed because BESS co-located with PV are 'not profitable', the government said. It expects the EUR100 million to be able to support the deployment of 160-330MW of BESS.
