

Air solar container patent transfer

This system is realized through the unique combination of innovative and advanced container technology. Our pioneering and environmentally friendly solar systems: ...

A vertical air-root-pruning container involving a series of vertical air gaps displaced around the sidewall of a container. The air gaps are alternately displaced outwardly or inwardly to air-prune spiral root ...

Methods and systems are provided for air conditioning, capturing combustion contaminants, desalination, and other processes using liquid desiccants.

Container tank having solar power generating device The present invention relates to a container ship having a photovoltaic device, and more particularly, by installing a solar panel on the top of the ...

The plurality of solar panels are configured to receive sunlight and convert to solar energy for storage in the battery and supply energy to electric vehicles during transport of the container (s).

Abstract: There is provided a container for absorbing water vapour from ambient air, the container having an opening to permit water vapour to enter the container, a perforate shelf ...

The round metal tank is constructed with a divider/separator to form two separate compartments to hold or contain liquid and/or air. On the horizontal extremities of the round metal tank are outlet openings ...

...

In today's dynamic energy landscape, harnessing sustainable power sources has become more critical than ever. Among the innovative solutions paving the way forward, solar energy ...

Electricity wherever you need it. A solar trailer is an eco-friendly mobile solution that allows you to power various devices using PV energy.

Abstract: A solar panel container unit comprising: one or more photovoltaic (PV) solar arrays each comprising a photovoltaic solar panel, and wherein the PV solar panel comprises a ...

Solar bubble pumps have Deen described in U.S. patents 4,552,208 issued 12 Nov 85 and 4,607,688 issued 26

Air solar container patent transfer

Aug 86 to Sorensen. Using the bubble pump principle hot liquid can be transferred from ...

The trays/containers also serve as a plant supply cartridges for air-pruned plants/seedlings/plugs so that they can be manually, semi-automatically or automatically removed from the open tray cell top or ...

The present disclosure concerns a large surface area solar energy generation apparatus and method that protects the solar system from meteorological or any other ambient threat and restores the...

The present invention relates generally to an environmentally friendly refrigeration unit and more particularly solar-powered refrigeration container that allows stored foods, beverages and other ...

The embodiments herein describe a container constructed in a preformed manner, such that no assembly of the container is required before use. The container includes a lid portion that is coupled ...

The present invention provides a portable evaporative cooler that is capable of being carried from location to location and readily used even in remote areas. The portable evaporative cooler contains ...

A foldable aquaponics, and greenhouse container system and method, includes an insulated shipping container having foldable insulated roof panel disposed thereover; a foldable glazing on a sun facing ...

An air conditioning system that can be driven by solar energy. A solar collector used energy from the sun to evaporate water from a desiccant fluid. The desiccant fluid is then flows into a mass transfer ...

A solar-power battery air freshener includes a housing (100) with an oscillating fan (61) for emitting a fragrance to the surrounding environment. A solar-power battery (20) utilizes energy derived from ...

Channing and William install a Solar Powered Roof Vent that is adapted to fit the roof corrugations of a sea can called the Big Air 400 CFM Solar Roof Vent f...

The present invention relates to the field of solar power generation substrates and systems, and more specifically relates to a solar panel protective container apparatus and system configured to protect ...

Hacon Solar: de slimste plug & play container die ooit is gemaakt. Waar je ook bent, Hacon Solar voorziet jouw project van schone en betrouwbare energie.

Definitions the present inventionrelates to the field of solar power generation substrates and systems, and more specifically relates to a solar panel protective container apparatus and system configured to ...

Container adapted for cargo or personnel transport, the container being substantially prismatic, cylindrical or cubic in shape, wherein the container comprises: an internal surface and an external ...

Air solar container patent transfer

The at least one plug receptacle is electrically coupled to the battery. The plurality of solar panels are configured to receive sunlight and convert to solar energy for storage in the battery and supply ...
