

California solar container subsidy policy document

What is the California Solar Consumer Protection Guide?

Check out the California Solar Consumer Protection Guide for the latest solar energy information & installation requirements. The California Public Utilities Commission (CPUC) presents the California Solar Consumer Protection Guide. The CPUC recommends that solar providers give out this guide during their first contact with potential customers.

Do solar panels have to comply with California Electrical Code?

Individual components of solar PV systems must comply with the California Electrical Code. This requirement applies to several system components, including but not limited to the installation's panels, modules, wire, inverters, connectors and disconnects.

What is the California Solar mandate?

The California solar mandate, effective Jan. 1, 2020, requires all new residential construction projects to have solar photovoltaic (PV) systems installed. It applies to single-family homes, condominiums, and apartment buildings less than three stories high.

What is the scope of the California solar permitting guidebook?

SCOPE: Use this plan ONLY for electrical review of utility central/string inverter systems not exceeding a system AC inverter output rating of 10kW on the roof of a one- or two-family dwelling or accessory building. The specific structural and fire requirements are covered in other parts of the California Solar Permitting Guidebook.

What are the California Solar permit requirements?

The specific structural and fire requirements are covered in other parts of the California Solar Permitting Guidebook. This covers photovoltaic system interconnected to the load side of a single-phase AC service panel of nominal 120/240Vac with a bus bar rating of 225A or less.

Do solar panels need to be listed in California?

The California Electrical Code requires these components in the solar PV system to be "identified and listed for the application." It is important to ensure that the solar system's components are listed within a product standard that covers the proposed use.
