

Energy-saving elevator solar container device

The proposed control strategy utilizes the reverse power flow to accumulate energy on the storage device, that will be later utilized during lifting trips. Excess recovered energy is injected to ...

Energy is stored by lifting wet sand containers or other high-density materials, transported remotely in and out of the lift with autonomous trailer devices. The system requires empty ...

Our goal was to achieve net-zero using a solar array that fits within the elevator footprint. Getting to Net-Zero Getting to net-zero starts with an efficient elevator. The Synergy elevator by thyssenkrupp used ...

The regenerative energy is produced during specific elevator operation scenarios. The energy can be stored and used to power elevators, buildings, or any specific grid-connected electronic devices.
