

Germany's installed solar container capacity

PVTIME - On 5 July, the German Solar Industry Association (BSW-Solar) announced that Germany's solar capacity had reached 107.5 GW, marking the halfway point towards its 215GW ...

Photovoltaic (PV) installations are the second largest generator of renewable power in Germany (after wind farms). According to the master market-related data register (Markstammdatenregister), which ...

The total capacity of all photovoltaic plants installed in Germany surpassed the 100 GW milestone at the end of 2024, with the share of solar energy in electricity consumption rising by two ...

In 2023 and 2024, Germany saw a remarkable surge in PV installations, with around 16 GW of new capacity added each year--well above the national targets of 9 GW for 2023 and 13 GW ...

OverviewCompaniesHistoryGovernmental policiesStatisticsSee alsoExternal linksThe history of Germany's installed photovoltaic capacity, its average power output, produced electricity, and its share in the overall consumed electricity, showed a steady, exponential growth for more than two decades up to about 2012. Solar PV capacity doubled on average every 18 months in this period; an annual growth rate of more than 50 per cent. Since about 2012 growth has slowed down significantly.
