

How much is a renewable hydrogen subsidy?

On April 29, 2024, the Dutch government announced that the subsidy scheme for the production of renewable hydrogen has been finalised. Seven projects have been awarded a subsidy coming down to a total of EUR250 million, which will be divided over the projects.

Can a partnership apply for a hydrogen in mobility subsidy?

Partnerships can apply for the Hydrogen in Mobility (Subsidieregeling Waterstof in Mobiliteit, SWIM) subsidy scheme. SWIM helps you fund new or upgrades to existing hydrogen filling stations, hydrogen vehicles, or the conversion of vehicles to hydrogen (retrofitting). What are the conditions for SWIM?

Can a large-scale hydrogen production project be combined with other subsidies?

Combining it with other subsidies, such as a subsidy for the 'Important Project of Common European Interest' (IPCEI), is possible under this subsidy scheme for large-scale hydrogen production if it does not interfere with the other subsidy. Your power generation facility must meet the following requirements:

What is a subsidy scheme?

This scheme, 'the Subsidy Scheme Scaling up fully renewable hydrogen production via electrolysis' (in Dutch: Subsidieregeling OWE), is meant to ensure that more and more renewable hydrogen is produced in the Netherlands and that more parties gain experience with it.

What is a large-scale hydrogen production using an electrolyser (owe) subsidy?

Then apply for a subsidy under the scheme for large-scale hydrogen production using an electrolyser (OWE). This subsidy is the successor to the 2023 subsidy scheme entitled 'Scaling up fully renewable hydrogen power generation using electrolysis' (OWE). We will continue to use the abbreviation 'OWE' for this. Who is eligible?

How does a hydrogen subsidy work?

The subsidy will close the price gap between renewable and fossil hydrogen. For the award, companies compete on subsidy requirement per megawatt of electrolysis capacity, the companies with the lowest subsidy requirement win the grant. A total of EUR998 million of subsidy was available.

The Netherlands is working on a future with sustainable energy. Read about the possibilities of hydrogen and which subsidies and schemes there are.
