The Guangdong Pumped Storage Power Station or Guangzhou Pumped Storage Power Station (Chinese: 广州抽水蓄能电站) is a pumped-storage hydroelectric power station near Guangzhou, Guangdong Province, China. Power is generated by utilizing eight turbines, each with a 300 megawatts (400,000 hp) capacity, totalling the installed capacity to 2,400 megawatts (3,200,000 hp). The generated power is sold to CLP customers in Hong Kong. The power station was constructed in two stages, the first...

When you hear "Guangdong Hydropower," you might think of dams and turbines. But here's the twist - they've quietly become China's third-largest energy storage system integrator since 2022.
