What is spot welding?

"This is an extremely versatile method of spot welding where a 5mm-thick solid copper plate forms a 'tabletop' on which the fabricated product is placed. Copper is used because of its high level of conductivity. The other conductor is a movable arm which can be easily maneuvered into tight spaces and corners.

What is table spot welding?

Table spot welding saves our operators from manhandling bulky items - the copper tabletop acts as a work bench whilst welding. This process requires far less man-hours than traditional welding and is very effective in high volume production applications." Please contact us first for any welding problems.
