

Design the Solar Rack and the Electronics The idea of a solar container isn't new-in fact there are commercial versions available with some very interesting features-if you have a few hundred ...

Traditional military clothing, on the other hand, may not help control body temperature in adverse weather situations. As a result, this study offers a solar- powered temperature- controlled e-uniform ...

Ljubljana's first energy cooperative in Siska District demonstrates how localized microgrids could work. Participants share stored solar power through blockchain-tracked transactions.

Researchers from the Faculty of Mechanical Engineering at the University of Ljubljana, led by Assistant Professor Dr. Primoz Poredos, in collaboration with researchers from the ITEWA Innovation Team at ...

The results underscored the non-uniform distribution of temperature fields in steel tubes under the influence of solar radiation, with notable sensitivity to their inclinations and orientations.

LZY-MS3 Bolt-On Solar Container delivers modular power generation with easy-to-install detachable solar panels. Quick deployment for construction sites, remote industrial applications and disaster ...

Looking for reliable solar energy solutions in Ljubljana? Discover how photovoltaic power generation and advanced energy storage systems are transforming Slovenia's capital into a hub for clean, cost ...

These portable power solutions address two critical challenges: integrating solar/wind energy into grids and providing instant electricity during emergencies. Imagine having a power plant on wheels that ...

During the days of installation of the solar power plant on Roof C, the temperature in Ljubljana reached up to 35°C. The installation on roof C was completed before the end of July. All day installation of the ...

# Ljubljana uniform temperature solar container board
