

Moldova steam solar container transformation plan announced

How much energy does Moldova need in 2023?

This means that in summer CHPs are off, and the imports from Transnistria meet about 90% of the total domestic electricity demand. Committed renewable energy capacity in the Republic of Moldova by 2030 is expected to reach 700MW. In 2023, renewable energy generation met 10.5% of the energy demand, compared to 5.5% in 2022.

What are Moldova's energy reforms?

Among other priorities, the instalment focused on energy sector reforms. Since 2022, Moldova's power system has been connected to the European continental electricity network. On 1 December 2024, the export capacity from the EU to Ukraine and Moldova was increased from 1.7 to 2.1 GW, including 315 MW for Moldova.

How does the EU support Moldova's energy system?

So far, the EU has already provided EUR240 million in direct budget support to Moldova's energy system from 2021 to 2024 to help the most vulnerable people. In the 2023-2024 heating season, more than 750 000 households have benefited from compensation through the EU-supported Energy Vulnerability Reduction Fund (EVRF).

Will Moldova reach net-zero by 2050?

However, to attain net-zero by 2050, the renewable energy capacity in the Republic of Moldova will have to increase 4 times from the 2024 levels. Today about 400MW of renewable energy capacity has been installed in the Republic of Moldova - of which about 230MW of solar PV, and 170MW of wind capacity.

How will Moldova's energy package work?

In the short term, the overall package will support Moldovan consumers who are facing steep price increases on the Right Bank. It will allow to compensate all excess electricity costs for all households for up to 110 kWh every month until 31st of December 2025.

How will the EU support Moldova in 2025?

It has a two-fold objective of decoupling Moldova from the insecurities of Russian supply of energy and fully integrating it in the EU energy market. Under this strategy, overall support for the Republic of Moldova would account to EUR250 million for 2025, of which EUR100 million will be provided by the EU by mid-April.
