

What is Amtak project in Muscat Governorate?

Today in Muscat Governorate, the Environment Authority, in cooperation with "Amtak" Company, organized a visual presentation about the project to update and upgrade the Authority's electronic services. Hold and swipe to the face that best represents your level of happiness. Get Awesome Updates Delivered Directly in Your Inbox.

How much solar energy does Oman use?

As clearly indicated in Table 3, the total reported solar energy consumptions in Oman as in 2017 is estimated to be at a maximum of 12 and 220 TJ, mostly from photovoltaic and heat sources, respectively. Other potential renewable energy resources, such as wind, geothermal, waves, and biogas, have been found to be abundant in Oman.

How much food waste is produced in Muscat?

One study found that about 60% of MSW generated in Muscat is composed of bio-waste, namely food waste, papers, textiles, and wood. It has also been estimated that the annual food waste composition of a typical landfill in Oman is about 140,000 tons.

Why should Oman invest in solar energy?

Considering the availability of Oman's high solar radiation levels and its vast arid lands, it is crucial for the country, through both local and international partners, to invest in solar energy productions for sustainable economic development.

Is wind energy a renewable resource in Oman?

Wind energy has been another valuable renewable resource in Oman, especially in both the northern and southern parts of the country. However, this form of energy has not yet been adequately exploited.

Are there any untapped geothermal resources in Oman?

The current geothermal energy resources in Oman have been poorly utilized; thus, more research and exploration projects are needed to discover other untapped geothermal reservoirs in the country.
