

Do you offer automatic extinguishing systems?

We offer various automatic extinguishing systems. Our RSL Fire aerosol generators, also known as 'Condensed Aerosol Generators' or 'Aerosol Fire Suppression Systems', are ideal for enclosed spaces as the aerosols can suppress the re-ignition of the fire for up to several hours.

What is an automatic aerosol extinguishing system?

An automatic aerosol extinguishing system consists essentially of the extinguishing generator, a fire detection system suitable for the extinguishing area and, if necessary, an electrical control device (EST) in the form of a control center. We offer solutions for the complete chain from fire detection to extinguishing itself.

What is a fully automatic fire extinguisher?

Our fully automatic extinguishing systems were originally developed for use in the aerospace and defense sectors. As a high-end fire extinguisher and aerosol generator, the extinguishing agent is based on a solid chemical compound that remains completely stable until activated.

Are Aerosol extinguishers suitable for refrigerated containers?

Our aerosol extinguishing systems and automatic fire extinguishers are extremely suitable for protecting containers. Whether it concerns the fire-sensitive elements in refrigerated containers or a valuable cargo.

What types of fire extinguishing systems does GreenEx offer?

GreenEx offers a wide range of user-friendly self-contained fire extinguishing modules and tailor-made modular suppression systems to address the commercial, industrial, and military market needs.

Do aerosol fire extinguishers have a built-in cooling system?

We are the only manufacturer to also offer VdS certified aerosol fire extinguishers without a built-in cooling system. As a result, less extinguishing agent is required per m³ and there are even less residual substances left after activation. The operation and benefits are otherwise the same as our units with a built-in cooling system.

Automatic Fire Suppression System for containers. Protect valuable cargo with RSL Fire. Highly efficient, durable and low maintenance.

The utility model belongs to the fire control field, concretely relates to automatic fire extinguishing device suitable for small space. It includes: the fire extinguishing device comprises a fire extinguishing agent ...

ELIDE FIRE®; Ball offers active and automatic fire suppression, combining simplicity with reliability. With high coverage, long-lasting durability, and no maintenance ...

Small solar container automatic fire extinguishing device manufacturer

We're professional fire extinguishing agent heptafluoropropane hfc227ea automatic fire extinguishing system manufacturers and suppliers in China, specialized in providing customized marine equipment ...

Main products Automatic Fire Extinguishing Ball, Automatic Fire Extinguishing Device and 826 more Products from Huizhou Tenyu Fire-Fighting Tech Co., Ltd. on Alibaba

The condensed aerosol fire suppression system is a new-style fire extinguisher. It is specialized made for bus/car engine compartments, electric vehicles, precision instruments, flammable storage, battery ...

The Aerosol Fire Extinguishing System is included in our comprehensive Fire Extinguisher range. When sourcing from China, verify supplier credentials and certifications to ensure quality and safety ...

Our aerosol extinguishing systems and automatic fire extinguishers are extremely suitable for protecting containers. Whether it concerns the fire-sensitive elements ...

Description o Automatic suspension of HFC-227ea/FM200 fire extinguishing device, assemble the container, container valve, nozzle, etc installed to the ceiling or the wall independently. once fire ...

Usually, cabinet heptafluoropropane is composed of the following components: cabinet gas fire extinguishing device, fire detector, gas fire extinguishing alarm controller, etc., with automatic ...

Our aerosol fire extinguishers and generators have an extinguishing capacity of 0.2 to 79 m³ per unit. Our smallest units are ideal for closed and small spaces such as the engine compartment of a classic ...

3. Simple operation: (1) Just instal the automatic fire extinguishine device in advance in the position ease to fire, in the case of the fire can efectively control the it; (2) The automatic fire extinguishing device is ...

In addition, a lithium battery fire extinguishing system is also an important part of the fire prevention system. Such systems usually use special extinguishing ...

Hengshen Aerosol Fire Extinguisher is a small, light unit with a actuator to provide immediate fire suppression. In the event of a fire, Hengshen ...

Established in 1996, SXFIREPRO set up its business from a small plant with limited capacity in the production of coupling to Group Company that covers an area of ...

Compact Automatic Aerosol Fire Extinguishing System, Find Details and Price about Small Control Box Fire Extinguisher Mini Automatic Fire Extinguishing System from Compact Automatic Aerosol Fire ...

Fixed automatic fire suppression systems react within a matter of seconds. They release extinguishing agents

Small solar container automatic fire extinguishing device manufacturer

before a fire can even develop and thus protect ...

We manufacture safety critical automatic fire suppression systems for a complete range of assets and industries. Our solutions are backed by our protection ...

Small Aerosol Fire Extinguisher Automatic Fire Extinguishing Device for Computer Room No reviews yet certified Zhishun Firefighting Equipment Manufacturing Co., Ltd. Multispecialty Supplier

The Electromagnetic mode suspended FM200 firefighting system is made up of an HFC-227ea extinguishing agent and its storage cylinder, container valve, nozzle, electromagnetic drive device, ...

Condensed Aerosol Systems are the ideal solution for electrical hazards. Renowned extinguishing capabilities as they're a flooding agent. Find out more ...

Product Name: Perfluorohexane fire extinguisher, automatic fire extinguishing device. Model: AW-NOVEC0.16 Dimension: 150*96*16mm. Extinguishing Agent: NOVEC-1230, FK-5112. Device Weight: ...

The small aerosol fire extinguisher is a new fire extinguishing product developed by our company based on the new energy industry. This product can be used for battery packs, cabinets for energy storage ...

Automatic Fire Suppression Systems by Reacton, leaders in setting standards in the manufacturing of fire suppression systems protecting assets globally.

Photovoltaic Inverter Fire Extinguisher -Highly effective aerosol fire extinguishing agent specially designed for the PV inverter and solar panel systems. 40 grams extinguishing compound is filled ...

The lithium ion battery energy storage automatic fire-fighting system provided by the utility model comprises: the fire extinguishing device, the pipeline and the fire detection pipe are arranged above ...

Two fire extinguishing systems could be protect energy storage containers, one is aerosol generator, another is gas fire suppression system.

A compact, innovative, and eco-friendly aerosol fire extinguishing device developed specifically for the characteristics of distribution cabinets. It features high extinguishing efficiency, fast fire suppression ...

As a China Mainland Automatic Fire Suppression Systems, Aerosol Suppression System, Special Hazard Fire Protection Systems and Vehicle Fire Fighting ...

Peripheral Manufacturing, Inc. is an expert in the design and installation of Aerosol fire suppression systems.

Small solar container automatic fire extinguishing device manufacturer

Our potassium-based, environmentally-friendly, fire suppression system for the computer, ...

Description o Automatic suspension of HFC-227ea/FM200 fire extinguishing device, assemble the container, container valve, nozzle, etc installed to the ceiling or the ...

Main products Fire Extinguishing Device, Fire Extinguishing System and 61 more Products from Zhishun Firefighting Equipment Manufacturing Co., Ltd. on Alibaba
