

Are luminescent solar concentrators a light harvesting solution?

Wiley Online Library

Luminescent solar concentrators (LSCs) are promising, cost-effective, large-area solar collectors for building-integrated photovoltaics (BIPVs). However, most of the recently reported ...

A Luminescence Solar Concentrators (LSC) [1], [2] is a simple light energy absorber, converter, and concentrating device consisting of a thin slab of a transparent material of ideally high ...

Context & scale Luminescent solar concentrators (LSCs) represent a promising frontier in solar energy capture, leveraging technologies to concentrate and reshape light for enhanced ...

The advent of quantum dots (QDs) enables us to reshape the incident light spectrum through absorption and re-emission. By exploiting the distinctive optical properties of QDs, a diverse ...

Safe and visually appealing experiments can help the general public, even from a young age, to better understand the fundamental role of chemistry and materials in the energy transition and our everyday ...

Working principle of a luminescent solar concentrator, irradiance (1) from the sun is incident on the transparent slab and absorbed by the luminophores (gray spheres) to be subsequently emitted (2 ...

This study presents the detailed fabrication and performance evaluation of large-scale luminescent solar concentrator (LSC) and plasmonic luminescent solar concentrator (PLSC) modules.

In this paper, we present a technology summary and update on the latest research advances in luminescent solar concentrators (LSCs). LSCs are optoelectronic devices based on a sun irradiation ...

This study compares different LSC technologies, including solar windows, within a simulated real-world environment and outlines the impact of upcoming technologies to determine ...

We developed a straightforward method based on detailed balance relations to analyze individual subcells in multi-junction solar cells via measuring absolute electroluminescence quantum yields. ...

Solar container and luminescence principle
