

Solar container ccs board

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Are scrubbers paving the way for onboard CCS systems?

But we didn't get here overnight. The evolution of scrubber technology within the maritime industry has been instrumental in paving the way for onboard CCS systems. Initially developed to comply with sulphur emission regulations, scrubbers have matured into versatile systems capable of addressing a range of pollutants.

Are Onboard Carbon Capture Systems (OCCS) safe?

There are currently no statutory regulations addressing the possible safety implications of using OCCS systems on board ships.

Is onboard CCS technology a carbon-reducing solution?

Foremost among the benefits of onboard CCS technology as a carbon-reducing solution is its current availability. Often, when we talk about low- and zero-carbon fuels, we are talking about changes that will take effect in years to come.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the Solarcontainer into operation within one day.

How many households can one Solarcontainer supply with electricity?

Is OCCs a promising solution for future vessels?

This stands out as one of the more promising solutions for future vessels", says Edvin Endresen, CEO of Solvang ASA. The ship Clipper Eris - owned by Solvang ASA - is the first to be installed with technology for "Onboard Carbon Capture & Storage" (OCCS).
