Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ ...

Currents often have to be limited in electronic circuits. For example, in a USB port excessive current flow must be prevented so that the electrical circuit can be reliably protected. Likewise, in a power bank, ...

Types of Current Limiting
Basic Constant Current Limiting Circuit
Two Transistor Linear Power Supply Regulator with Current Limiting
Transistor Foldback Current Limited Circuit
There are a number of circuits that can be used for constant current limiting for power supply protection, but one of the simplest circuits uses just three electronic components: two diodes and a resistor. The circuit for the power supply current limiter uses a sense resistor placed in series with the emitter of the output pass transistor. Two diodes...
