

Solar container transshipment patent application

The at least one plug receptacle is electrically coupled to the battery. The plurality of solar panels are configured to receive sunlight and convert to solar energy for storage in the battery and supply ...

A linear fresnel solar power system which is transportable in a goods container, wherein the solar power system comprises: a number of rows of reflective mirrors, and a support structure, the support ...

The present invention relates to a container ship having a photovoltaic device, and more particularly to a container ship having a photovoltaic device that can reduce the cost per unit power by producing ...

The present invention relates generally to an environmentally friendly refrigeration unit and more particularly solar-powered refrigeration container that allows stored foods, beverages and other ...

The plurality of solar panels are configured to receive sunlight and convert to solar energy for storage in the battery and supply energy to electric vehicles during transport of the container (s).

This page includes the patent name, patent number, legal status, invention/applicant, technical efficacy and accompanying drawings of Transshipment-related invention patents and utility model patents, ...

The utility model belongs to logistics and transportation technical field more particularly to a kind of container transshipment anti-fall device. The device includes basic framework, connection component ...

Justia Patents By Use Of Laterally Moving Crane US Patent Application for Container crane apparatus and method for container security screening during direct transshipment between transportation ...

The present invention solves the problem of securing the depth and dock depth of the existing port infrastructure by enabling transshipment between container ships at sea, and floating transshipment ...

The present invention relates to the field of solar power generation substrates and systems, and more specifically relates to a solar panel protective container apparatus and system configured to protect ...

Therefore, for a large quantity of transshipment goods, by consolidating the transshipment orders 2 of the plural transshipment goods with the same attributes into a single delivery order 3, the driver can ...

The invention relates to stacking and transport vehicle for container transshipment facilities and container warehouses, consisting of the vehicle frame with wheels, drive units, a telescoping lifting ...
