

Sungrow 1500v solar container returns to domestic market

Is the delivery of Sungrow inverters normal?

According to Sungrow, the delivery of Sungrow inverters is normal at present, because the factory in Thailand is related to the US market. In the first quarter, the risk of Trump's tariffs was predicted in advance, so the delivery speed was accelerated, and even some goods in the second quarter were sent to the United States in advance.

How much will Sungrow's energy storage business make in 2024?

From the perspective of gross profit composition, in 2024, Sungrow's energy storage business will have a gross profit of 9.16 billion yuan, officially surpassing the 9 billion yuan of the inverter business for the first time, becoming the largest business composition.

Where did Sungrow manufacture the energy storage system?

Among them, the battery energy storage system of the 7.8GWh energy storage project was manufactured by Sungrow in just 58 days and shipped from Taicang Port in Jiangsu. More than 200 Sungrow engineers have gone to Saudi Arabia to assist in completing the project.

Why is Sungrow not doing business in the United States?

Therefore, facing the uncertainty of high tariffs in the U.S. market, Sungrow has chosen not to do or reduce its business in the United States for the time being, retaining its existing market share and waiting for the tariff policy to become clear before making adjustments.

Will Sungrow be profitable in 2023-2024?

Yesterday (April 26), Sungrow released its 2024 annual report and 2025 first quarter report. Many data significantly exceeded market expectations, making it one of the few companies in the photovoltaic energy storage industry chain to remain profitable in 2023-2024. Several core data are as follows: Revenue reached 77.

What does Sungrow do?

At Sungrow, we are committed to promoting the development and application of clean energy across all major energy technology sectors, including solar, wind, storage, electrification, and hydrogen. Our goal is to increase the adoption of clean energy and drive more creative, innovative ways to use clean energy.
