What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

What is a self-unloading mobile solar container?

Self-unloading mobile Solar Container. Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work.

Why should you choose a mobile solar container?

The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction,our containers offer unmatched flexibility and mobility. Great protection for the sensitive solar arrays against storms,vandalism,and all kinds of possible threats. Mobile solar containers application visuals.

Can a solar array be used inside a container?

Solar arrays inside of a container are applicable in a number of ways. Constant improvements in PV technology make it a great,future-proof solution. Below you can find just a few examples of the possible applications. The abundance of sunlight in the deserts makes solar-powered systems the most obvious choice in these areas.

How many installers does a solarcontainer need?
