

What are the types of new solar container patents

The present invention relates to storage and protection of electronic devices, and, more particularly, is concerned with a solar-charging storage container apparatus, such as for rechargeable mobile ...

The container for transporting semiconductor wafers of solar cells consists of a bottom (1) and guide elements for accommodating solar wafers. On the upper side of the bottom (1), parallel to the central ...

Solar powered portable food container Abstract A portable food container is cooled by a solar powered refrigeration unit and includes a thermoelectric power unit and heat pipes so that the container will be ...

A solar-charging storage container apparatus includes a container body having a top rim, a container lid having a bottom rim and being adapted to overlie the container body such that the container body ...

? ??? ??? ??? ?? ????? ??? ????? ??? ??? ?? ??? ????? ?? ??? ??? ????? ??? ? ?? ??? ???
...

The at least one plug receptacle is electrically coupled to the battery. The plurality of solar panels are configured to receive sunlight and convert to solar energy for storage in the battery and supply ...

There are two main types of solar technology: photovoltaics (PV) and concentrated solar power (CSP). Solar PV technology captures sunlight to generate electric power, and CSP harnesses the sun's heat ...

The present invention relates to the field of solar power generation substrates and systems, and more specifically relates to a solar panel protective container apparatus and system configured to protect ...

The container-type water purification apparatus of the present invention has at least a solar cell module disposed on a top plate of a container for freight transportation, and a plurality of pumps operated by ...
