How to invest in green energy using exchange-traded funds?

WalletInvestor.com

What are solar energy ETFs?

Solar Energy ETFs invest in stocks of companies involved in providing goods and services exclusively to the solar energy industry. See more Click on the tabs below to see more information on Solar Energy ETFs, including historical performance, dividends, holdings, expense ratios, technical indicators, analysts reports and more.

Why should you invest in a solar energy ETF?

This ETF is a high-impact choice due to its innovative, AI-driven approach to company selection. This methodology suggests a dynamic investment strategy, potentially more adaptive than traditional index-tracking ETFs. Its diverse holdings span solar, energy storage, and traditional energy companies that are actively transitioning to clean power.

How to invest in green energy using exchange-traded funds?

A look at some of the best ways to invest in green energy using exchange-traded funds. Investing in clean energy ETFs gives investors broad exposure to the sector. The top clean energy ETFs diversify across technologies and geographies, reducing risk.

What is the Invesco solar ETF?

The Invesco Solar ETF focuses on companies in the solar energy industry. That includes companies that manufacture panels and electrical components and install solar energy systems. The ETF had almost 40 holdings as of mid-2025, led by the following five:

What factors should you consider when investing in a solar/wind ETF?

Key factors to consider include the ETF's specific investment strategy (e.g., broad clean energy vs. pure solar/wind), its expense ratio, historical performance across various timeframes, and its comprehensive sustainability profile (including Morningstar Sustainability Rating, Carbon Risk Score, and fossil fuel involvement).

How are solar energy ETFs ranked?

Solar Energy and all other industries are ranked based on their aggregate assets under management (AUM) for all the U.S.-listed ETFs that are classified by ETF Database as being mostly exposed to those respective industries. If an ETF's industry classification changes, it will affect the aggregate AUM calculations.
