Should I buy a ZF 15400?

I think the general consensus right now is yes for the 15400. Just make sure to get the ZF with the SA3120 super clone movement as the older ZF's have the MIYOTA movement in them and are still widely sold. The white 15400 is also stunning, probably the best sunburst of all the colors.

Does AP 15400 ZF have a Miyota clone movement?

Yea, the AP 15400 ZF on the website is the older version with the Miyota movement. Reach out to Eric on Whatsapp and ask for the version with the SA3120 super clone movement if you want that version. Did you get this in hand yet?!

Does the 15400 ZF have sunburst?

The black dial on the 15400 ZF is decent, but does lack some of the sunburst that the Gen had under certain lighting. Not saying Gen had a lot of sunburst compared to silver or blue, but it did have a little more than the rep - Movement looks pretty good, but def differences to the Gen.
